

Project Demo Planning

Date: 04 July 2026 **Team ID:** SOLO-CCFD-2026 **Project Name:** Credit Card Fraud Detection using Machine Learning
Maximum Marks: 1 Mark

S.No	Demo Section	Description	Duration (mins)	Responsible Member
1	Introduction & Problem Statement	Explain why fraud detection is hard at scale (class imbalance, transaction volume)	2	Ayusha Sanjuktha Chekka
2	Dataset Overview	Walk through the ULB Credit Card Fraud dataset and its class distribution	2	Ayusha Sanjuktha Chekka
3	Model Training & Comparison	Show precision/recall/F1/AUC results across the four algorithms	3	Ayusha Sanjuktha Chekka
4	Live Flask App Demo	Submit a sample transaction and show the Fraud/Genuine prediction	3	Ayusha Sanjuktha Chekka
5	Deployment Overview	Explain the IBM Watson ML deployment pipeline	2	Ayusha Sanjuktha Chekka
6	Q&A Session	Answer evaluator questions	3	Ayusha Sanjuktha Chekka

Demo Flow Summary

Step	Activity	Notes
1	Introduction & Problem Statement	Set context: rare-event classification problem
2	Solution Overview	Summarize the ML pipeline and architecture
3	Live Feature Demonstration	Run a genuine and a fraudulent sample transaction through the app
4	Q&A Session	Address evaluator questions on model choice and metrics
